

LIBERTY SKOPJE ENVIRONMENTAL POLICY

NOVEMBER 2023

Liberty AD Skopje is involved in all aspects of the modern steel production. The business manufactures cold rolled steel galvanized coils & sheets, and pre-painted coils. The plant has several manufacturing operations, including: a Pickling line, Tandem mill, Temper mill, a Galvanizing line, and an Organic coating line. Steel is very sustainable because once it is made, it can be used forever. Steel can be recycled an infinite number of times.

High environment protection is included in all process activities, and Liberty Skopje is committed for:

- 1. System implementation for controlling the environment protection, including ISO 14001 certification at all production capacities.**
- 2. Continuously improving at environment protection, through systematic monitoring and taking prevention.**
- 3. Alignment with all relevant laws, regulations, and company obligations for environmental protection.**
- 4. Development, improvement, and implementation of production methods that do not influence the environment.**
- 5. Usage of materials focusing on their properties for later recycling.**
- 6. Effective use of natural resources and energy.**
- 7. Management and reducing the CO2 emissions during steel production.**
- 8. Dedication of the employees and responsibility towards the environmental protection.**
- 9. Notification of suppliers and contractors with the policy and compliance with requirements, and commitment of Liberty AD Skopje to protect the Environment**
- 10. Open communication and dialog with all affected from the operation in Liberty AD Skopje.**
