MEMBER OF

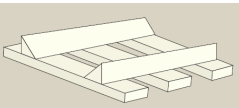

## For Pickled & Oiled, Cold Rolled & Galvanized Coils

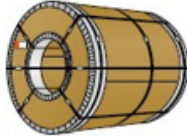

### C16

	2 circumferential straps + seal protectors as close as possible to the edges
	Inside sleeve protection (cardboard)
	Paper or plastic wrap
	2 outer edge protection rings (steel)
	2 inner edge protection rings (steel)
	4 radial straps at 2-4-8-10 o'clock

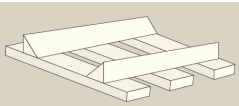

### CL6

	Wooden cradle + C16 for loading on trucks
---	---

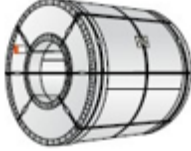

### C24

	Thickness $\leq$ 1mm: 1 radial strap + corner protectors or *Us* (steel) at the end of the external lap
	Thickness $>$ 1mm: 2 circumferential straps + seal protectors as close as possible to the edges
	Paper or plastic wrap
	Inside sleeve protection (hardboard for CRC & P&O $<$ 4mm, steel for P&O $>$ 4mm)
	Outside sleeve/circumferential protection (hardboard)
	1 central circumferential strap
	2 side protection disks (hardboard /steel)
	2 inner & 2 outer edge protection rings (steel)
2 circumferential straps on the outer edge protection rings	
6 radial straps for external diameter $\geq$ 1400 mm (4 radial straps for external diameter $<$ 1400 mm)	

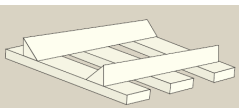

### CM4

	Wooden cradle + C24 for loading on trucks
---	---

### C26

	Thickness $\leq$ 1mm: 1 radial strap + corner protectors or *Us* (steel) at the end of the external lap
	Thickness $>$ 1mm: 2 circumferential straps + seal protectors as close as possible to the edges
	Inside sleeve protection (cardboard)
	Paper or plastic wrap
	Inside sleeve protection (hardboard)
	Outside sleeve/circumferential protection (steel) + 1
	Circumferential strap + 1 seal protector
	2 side protection disks (steel)
	2 inner edge protection rings (steel)
	2 outer edge protection rings (steel)
2 circumferential straps on the outer edge protection rings	
6 radial straps for external diameter $\geq$ 1400 mm (4 radial straps for external diameter $<$ 1400 mm)	

### CM6

	Wooden cradle + C26 for loading on trucks
---	---

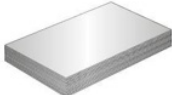

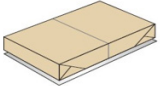

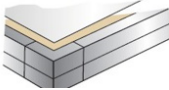

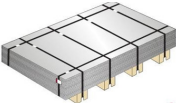

## For Cold Rolled & Galvanized Slit Coils

### CL6

	All slits tied in one bundle
	Inside sleeve protection (hardboard) Paper or plastic wrap
	2 outer edge protection rings (steel)
	2 inner edge protection rings (steel)
	Wooden cradle

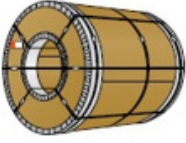

## For Cold Rolled & Galvanized Sheets

### SB5

	1. Stacked Sheets
	2. Paper or plastic wrapping; underside steel protection sheet
	3. Upper and lower angle corner protection strips; transversal and longitudinal upper and lower edge protection strips; topside steel protection - sheet
	4. Transversal support beams + longitudinal planks
	5. 2 LS next to the side boards if width <1000 + 1 additional LS if width > 1000; 1 transversal strap by support beam Maritime Continental or Intercontinental transport Protection against rust; Complete steel protection Transversal support beams + longitudinal planks

# For Organic Coated Coils

## L24

	Thickness $\leq$ 1mm: 1 radial strap + corner protectors or *Us* (steel) at the end of the external lap
	Thickness $>$ 1mm: 2 circumferential straps + seal protectors as close as possible to the edges
	Paper or plastic wrap
	Inside sleeve protection (hardboard)
	Outside sleeve/circumferential protection (hardboard)
	1 central circumferential strap
	2 side protection disks (hardboard)
	2 inner edge protection rings (steel)
	2 outer edge protection rings (steel)
	2 circumferential straps on the outer edge protection rings
6 radial straps for external diameter $\geq$ 1400 mm (4 radial straps for external diameter $<$ 1400 mm)	

## LM4

	Wooden cradle + L24 for loading on trucks
---	---

# For Hot Rolled Coils

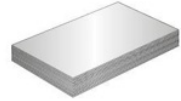

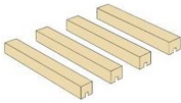

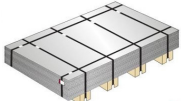

## H04

	6 Radial straps; 3 circumferential straps
---	---

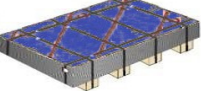

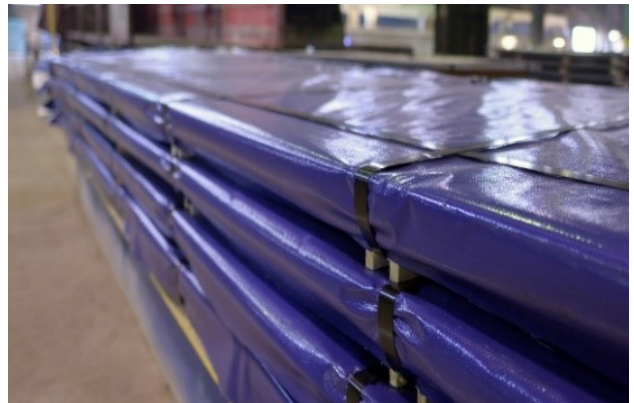

# For Hot Rolled Sheets

## S01

	1. Stacked Sheets
	2. Transversal Support Beams
	3. Rail or Road Transport ; (all modes for non coated hot rolled sheets) Without Protection; Transversal Support Beams; 2 Longitudinal Straps; 1 Transversal strap by support beam

## S21

	S01 with one topside paper protection sheet
---	---
