

**LIBERTY**

**LIBERTY GALATI S.A.**  
**EMERGENCY SITUATIONS POLICY**

**LIBERTY GALATI SA** is the largest steel producer company in Romania, part of GFG Alliance. The organization's corporate vision is we want our people and all members of the GFG family to be safe, always.

We believe that all incidents and major industrial accidents can be prevented and that:

**NOTHING IS MORE IMPORTANT THAN THE HEALTH AND LIVES OF OUR EMPLOYEES.**

Our organization will be stronger by including the employees and property into the whole decision making process, as an integral part of all company activities.

**Our target is ZERO INCIDENTS.**

We are continuously promoting the use of all equipment at performance levels to meet the production or services requirements, with optimal maintenance costs, without causing prejudice to the health and safety of our employees, the environment or the organization's (the unit's) image / reputation.

To carry out the principles of this policy, we commit to:

- Implement a comprehensive industrial risk management system fully integrated into the corporate system
- Compliance with the entire emergency situations legislation as well as other corporate rules taking into account the alignment to the other functional requirements
- Continuous improvement of practices, targets and all raising the awareness actions of the industrial risk management system
- Communicate emergency plans and keep dialogue at all levels in order to create transparency and industrial risk awareness for all employees
- Develop the best practices and work rules
- Provide adequate training for all employees in the emergency situations field
- Investigate ALL incidents and major industrial accidents and limit the consequences for man and plant
- Evaluate and implement the necessary measures to prevent and limit the consequences of possible losses
- Establish measurable objectives and targets to ensure continuous improvement in the emergency situation field
- Strengthen the leaders' direct responsibility regarding the enforcement of the Risk Management procedure
- Compliance with all procedures and work practices for emergency situations
- Reporting all incidents immediately after their occurrence
- Conformation with the interdictions regarding access in hazardous fire and explosion areas, carrying ignition sources
