

Project no 28

Stakeholder management

Applicant

Department: Projects
Section/Office: Progress

Applicant's name: Vereş Cătălin
Position: Head of Department

Data regarding the Internship

Program run: **12.07.-22.09.2023**

Duration of the internship: **2.5 MONTHS**

- **Description of the project (aim):** Provide students with a comprehensive understanding of the stakeholder management process in steel-making projects. This will involve gaining an understanding of the various stakeholders involved in steel-making projects, their expectations and needs, and the techniques for effectively managing these relationships.
- **Objective(s):** Equip students with the knowledge and skills necessary to effectively manage stakeholders in steel-making projects. This includes identifying key stakeholders, understanding their expectations and needs, developing effective communication strategies, and managing stakeholder relationships throughout the life cycle of a project.
- **Description of the main activities of the intern:**
 - Research best practices for stakeholder management in steel-making projects.
 - Analyze the stakeholder landscape of an actual steel-making project.
 - Develop a stakeholder management plan for the steel-making project, including identification of key stakeholders, communication strategies, and engagement plans.
 - Implement the stakeholder management plan, including regular communication with stakeholders and monitoring of stakeholder satisfaction.
 - Evaluate the effectiveness of the stakeholder management plan and make recommendations for improvement
- **Project deliverable (at the end of Summer School):**
 - A written report on their research into best practices for stakeholder management in steel-making projects.
 - A presentation on their stakeholder analysis and stakeholder management plan for the steel-making project.
 - A final report on the implementation of the stakeholder management plan and the evaluation of its effectiveness, including recommendations for improvement.
