Statement regarding Elimination of the Risk of Radioactive Material

Liberty Merchant Bar Plc (LMB) purchases steel billet from a small number of approved suppliers.

Within the Billet Purchase Agreements suppliers are required to ensure and confirm that all steel supplied to LMB will be non-radioactive under the meaning of The Environmental Permitting (England and Wales) (Amendment) Regulations 2012, and Ionising Radiation Regulations 2017.

In addition, strict controls in place on our site in Scunthorpe ensure that:

- Billet supplied by British Steel, Scunthorpe, is verified as non-radioactive by the supplier's own radiation detection on this site.
- Billet from other suppliers is verified as non-radioactive either by LMB's high sensitivity roadside radiation detection unit or by skilled operators using a mobile hand-held radiation detection meter.

For and behalf of Liberty Merchant Bar Plc.
