# Environmental Policy

Liberty Merchant Bar plc (LMB) operates two merchant bar mills at its Scunthorpe site, which transform steel billets into a variety of products for a diverse range of customers, located both within the UK and in export markets.

We recognise that the processes employed demand significant water and energy consumption and have the potential to cause significant emissions to air, land and water, all of which need to be effectively managed and controlled.

LMB is committed to protecting the environment and preventing pollution. It is our policy to eliminate or reduce the impact of our activities, products and services on the environment and, to this extent, our Environmental Management System provides a framework for managing our activities responsibly and ensuring the awareness and engagement of all employees, key suppliers and contractors.

Fundamentally, we are committed to the following:-

- Targets and objectives will be routinely set to drive continuous improvement.

- We will monitor, review and improve our environmental performance against these targets in order to minimise the impact of our activities, products and services on the environment.

- We will manage all resources responsibly, seeking to reduce energy and water consumption and to minimise waste through the recycling of materials wherever possible.

- We will ensure that emergency procedures and contingencies are in place to prevent, mitigate and control any accidents or unplanned events that may have potential to cause harm to the environment.

- Periodically we will audit and review our arrangements and this policy in order to continuously enhance our environmental performance.

Liberty Merchant Bar plc will thereby fulfill all applicable environmental compliance obligations, both regulatory and others to which our company subscribes.

KEITH SHILLAM
