

SCIP Database – Information Requirements

Liberty Speciality Steels is based within the UK. As this now sits outside the EU it is no longer legally possible for us to register our products on the SCIP database. This duty therefore falls to whoever imports our products into the EU.

This document has been produced to assist our customers with this task and should contain all the information required. It has been created in good faith and is based on information on the ECHA website, on the SCIP database, our export paperwork, and our product data sheet.

Article identification	
Name	Free cutting steels, high machinability steels, leaded steels
Primary article identification	Free cutting steel bar
Article category (CN/TARIC)	7213 20 00 Bars and rods, hot-rolled, in irregularly wound coils, of iron or non-alloy steel Other, of free-cutting steel
Safe Use Instructions	
	The lead in machinable steels poses no risk in massive form. When machining control measures should be used to control exposure. These should include: <ul style="list-style-type: none">• Engineering and ventilation controls• Organisational measures to prevent/limit releases, dispersion and exposure.• Environmental controls to prevent emission to water or air.
Candidate List Substance	
Identification of substance	Lead EINICS No. 231-100-4 CAS No. 7439-92-1
Concentration in article	0.1 – 0.35% (w/w)
Mixture category (EUPCS)	None. This is an article and not treated with any chemical mixture.
