

GREENSTEEL- UK recycled scrap, melted using renewable energy to make sustainable steels for advanced manufacturing

Environment and Energy Policy Statement

Liberty Speciality Steel is committed to meeting the requirements of relevant legislation in the countries and regions in which it operates, through the efficient use of natural resources and energy, and to reducing continuously the environmental impact of its operations and products through the adoption of sustainable practices to protect the environment. These commitments are integral to the Liberty Steel **GREENSTEEL Vision**.

Policy Principles

In implementing the Policy the following key principles will be demonstrated:

Management system

Effective environmental and energy management systems will be implemented and maintained, and these will ensure awareness and encourage every employee to act in an environmentally responsible manner.

Continuous improvement

The environmental impact of processes and products will be assessed and continuous improvement will be a key business objective.

Climate change

Liberty Speciality Steel will be part of the solution to climate change with a carbon neutrality by 2030 commitment (CN30) we will achieve a leading position within the steel industry by minimising its greenhouse gas emissions and developing products that help to reduce emissions from the rest of society.

Sustainable use of resources

Efficient and sustainable use will be made of energy, raw materials and water through adoption and sharing of good practice.

Life Cycle of Products

The reuse and recycling of Liberty Speciality Steel products will be promoted and the environmental effects of products throughout their life-cycle will be communicated to customers. Our UK produced steel has over 95% recycled content. LCA for our products have been produced and EPDs published to demonstrate the sustainability benefits of our steel.

Monitoring and reporting

Environmental and Energy performance will be monitored and audited and progress in meeting high-level Policy objectives and improvement targets will be recorded and reported.

Sustainable procurement

Key suppliers and contractors will be encouraged to behave in an environmentally responsible manner and to abide by principles similar to those set out within this Policy.

Local communities

Communities in the locality of its sites will be engaged by Liberty Speciality Steel so that it can understand and seek to address their concerns in relation to environmental issues.

Supporting Biodiversity

Wildlife habitats in and around Liberty Speciality Steels sites will be respected and, where opportunities arise to do so in a way that is conducive to business operations, they will be progressively enhanced for the benefit of nature.
